SPORTS DAY 2022-23

The Sports Day started with the chief guest, Ms. Kavita Chittiappa, arriving and being accompanied to the ground by our sports captain, Harris Khan. As the day moved on, the first thing on the list of wonderfully planned events was the March Past. All the house colors lined up behind their respective captains. The March Past began as the band began to play. At the end of the march past, all the houses were lined up behind their captains. Students from grades three to five put on a spectacular show with their smart walk just as the march past came to an end. After waving their hands and wearing bright smiles as they passed the stage, they lined up beside the houses.

Shortly after the smart walk, the sports captain took an oath. After taking the oath, the Olympic Torch Relay began. The students were chosen based on their passion and their involvement in sports. As the torch relay came to an end, each house moved back into their tents at the far end of the ground, decorated with a unique theme.

As the races began, so did the cheering. Each house enthusiastically cheered for their players. Between races, grades took turns performing skits. After the relay races and prize distribution, the parents were called onto the ground to play a game. The students started cheering louder, this time not for the house but for their parents.

Soon after the teachers and alumni played games created for them, a few people from each house were called to play tug of war. Once the tug of war was over, the prize distribution for individual championships started.

The overall house points were called out and the closing ceremony began.

Yellow House was declared the winner and the cheering and hooting for their house was incredible. The students carried their Captains on their shoulders and took a victory lap of the field. Another memorable event made its mark at Oasis International School.

OASIS SPORTS FEST

A sports fest was held in order to raise funds for the ECOASIS committee that works on environmental issues.

It was decided that the perfect way to support ECOASIS was to make it an enjoyable and memorable day. The event took place on a Monday. Tuck shops, face painting stalls and technical arrangements were made. The stalls played a huge part in the fest as it was one of the main sources of the funding.

At the Tuck-shops they sold food, beverages, ice-cream, fast food, team badges and even player cards. The players that were selected had to be photographed and then with those photographs, the cards were printed out including the rank of the specific player, their nickname and name. The event started with the Girls' soccer and Boys' basketball games.

Cavaliers vs Warriors

England versus Argentina

OASIS
INTERNATIONAL
SCHOOL

The soccer and basketball games were played in the format of how FIFA and NBA are held. The team names were also taken from FIFA and NBA. The players were allotted tents and energy drinks.

And the rest of the students sat around the field to watch the game. Music was played and from grade 3 and above, students had the entire day free in order to attend the fest. Both Teachers and Students had fun helping around in the Tuck-shops, volunteering, and watching the game. It was an event full of cheering and suspense and after the Soccer and basketball teams found their winners: Portugal in FIFA and Cavaliers NBA. Then the Oasis International Sports Fest 2023 was declared closed.

KUPPAM FIELD TRIP

Agastya International Foundation, which is located in Kuppam, Andhra Pradesh, was visited by students of grades 9 and 10. It was a two-day trip to Agastya, a non-profit organisation which was founded in 1999 with the mission of providing practical education to students across the country.

Agastya focuses on hands-on experience, as they believe that children grasp the concepts better that way. The students were accompanied by 6 teachers, who took excellent care of them. The group left on the chilly morning on January 6th, 2023- Boys and January 12th, 2023- Girls.

As they reached Agastya, they had breakfast and were then allotted respective rooms in the campus. They rested for a while in their rooms, and then took off to visit the Biology and Chemistry Lab where they performed various experiments. The students enjoyed themselves while exploring the labs. They encountered mind blowing models and projects, which helped them understand concepts better. As they reached the campus, they entered their rooms and spent blissful quality time together. The next day morning, the students were accompanied by Mr. Laksh for a nature walk, where they learned about various trees and plants.

OASIS

SCHOOL

The 9th and 10th grade students visited a math park and a physics lab where they participated enthusiastically in engaging activities. Later on, the pupils were fascinated by the unique artworks in the Art Lab and were in awe of the stunning recycled art. The students took part in an activity of designing currency notes and put all of their creativity into it. They came up with interesting security techniques, which helped them understand the importance of the Indian currency and its security. At the end of their enjoyable stay, they visited Gurugruha, a planetarium.

From watching the sunset together, to eating together and having fun, the students were focused throughout and enjoyed their stay at Agastya. The teachers equally had fun spending time with the students in a new environment, and learnt many valuable qualities from this stay. They returned to Bangalore around 9pm on 7th January(Boys) and 13th January(Girls). They had a great time and definitely are looking forward for more such field trips in the future!

REPUBLIC DAY

Republic Day is observed on January 26, 2023. India will commemorate the 74th Republic Day this year. On January 26, 1950, India's constitution was adopted, and the country was transformed into a republic. Every year, the day's celebrations include stunning military and cultural pageantry.

Armed forces personnel march along the Kartavya path in New Delhi in an elaborate display of military might. Everything else going on in the country on this auspicious day pales in comparison to the magnificent show on Kartavya Path. The festivities begin with a huge parade on Raisina Hill near the Rashtrapati Bhavan (President's House), and continue along the Kartavya road, through India Gate, and towards the old Red Fort. Ceremonial parades are held at the Kartavya way on this day as a tribute to India, its unity in diversity, and its rich cultural legacy by the states of India by constructing exquisite tableaux.

CHAT-GPT

The human brain has great potential and creativity that could do wonders, but what if this creativity is killed due to rapid, advancing technology, causing artificial intelligence to take over? ChatGPT, a chatbot developed by Open AI in November 2022, can kill human creativity and corrupt the education system. It is an open-source platform that can process large amounts of human-generated data to create various forms of writing based on a simple command.

To the great advantage of students looking for a shortcut to complete homework, it is free and available to anyone with an Internet connection. It runs clean through plagiarism checks, an advantage to students dependent on it to complete assignments, while a disadvantage to schools. Even though it could have its advantages, at large, the education system views it as an enemy, ready to take down its students.

To prevent the education system from losing its value, schools in various places, including New York City, have banned ChatGPT on their devices and networks. It is currently at capacity, posing a challenge to the students who have fallen into the trap of becoming dependent on it. It has left many wondering if machines can do all the writing, will students still need to?

CHAT-GPT

What's wrong in trusting the new AI Bots dominating the world? Chat GPT is an excellent. Chabot invented in November,22 . It is an extensive language model initiated by the Open. Artificial Intelligence (AI). It is truly based on the Generative Pre- training Transformer (GPT) architecture. It is a vast platform that helps us in distinct writings effortlessly. According to researches, it is proved that Chat GPT crosses 1 mil users in less than a week.

Chat GPT has numerous advantages and applications.

Chat GPT has a high clarity and fluency of words. It is trained on a large text dataset, allowing it

to generate highly fluent and coherent responses to a wide range of prompts.

ChatGPT's ability

to generate text that is nearly identical to text written by a human makes it a useful tool for

tasks such as chatbots, virtual assistants, and automated content generation.

CHAT-GPT

ChatGPT's versatility allows it to be used in a wide range of natural language processing tasks, including language translation, text summarization, and dialogue systems. It can respond quickly, making it useful for real-time applications.

ChatGPT's API allows it to be easily integrated into existing systems and applications. Continuous learning entails being able to fine tune the model in response to new data. In a few cases, it can lead to plagiarism but it is an excellent tool for students and teachers when used appropriately and wisely.
